# FRONTIER SPIRIT: INNOVATIVE SOLUTIONS

## **We Are Frontec**

We began in Canada, a country built by frontier spirit that compelled generations to build lives in some of the world's challenging locations. Today, that frontier spirit drives our global operations, challenging us to find innovative solutions to the issues of the world's most demanding projects.

## **We turn obstacles into opportunities**

With operations around the world, we can deploy support services, disaster relief and manage remote accommodations wherever they're needed. Along with equipment, supplies, personnel and management, we provide essential real-life support anytime, anywhere.

## **What We Stand For**

Every member of our team lives our values, representing the best elements of our frontier spirit wherever they work. That's why we believe it's essential to empower our employees to confidently seize opportunities with a simple but essential question: "How could we do this better?"

Let's answer that question together. Because on the frontier, we're always looking ahead.

# OPERATIONAL SUPPORT SERVICES

Our goal is to help you reduce overall operating costs and improve operational efficiency. From basic building maintenance to complete asset management and lifecycle planning, we can ensure your facilities and equipment are running smoothly, allowing you to focus on your business.

## Facilities Management

Even the most sophisticated facility needs expert management to function, which is why we provide:

- Project management
- Building envelope and equipment maintenance
- Roads and grounds keeping

## Camp Services

We understand the importance of providing your remote workforce with a genuine home away from home. We strive to provide this level of service with the highest quality:

- Catering
- Housekeeping/janitorial
- Administration

## Airfield Services

We know what it takes to deliver airfield services under the most demanding conditions, which is why we offer comprehensive suite of airfield services including:

- Fire/Crash Rescue services
- Runway maintenance
- Passenger and cargo handling
- Aircraft handling and fleet management

## Communications & Radar Operations

From the austerity of multiple remote northern locations to the daily operations of industrial operators, we provide facility operations and maintenance in addition to practical experience in highly technical areas including systems administration and data acquisition.

## Fuel Management & Distribution

Working with fuel is a serious matter. In remote locations, it keeps your business or community running, so we prioritize quality and safety when delivering and storing fuel.

## Solid Waste Management

No matter how efficient the operation, waste is an inevitable part of the process. Our expertise with solid waste disposal, management and recycling in a variety of frontier and urban environments assures you of the perfect solution for your needs.

## Water/Wastewater Management

Every site needs water, from drinking water to washroom facilities. To maintain safety and environmental responsibility, whether at a work camp or remote community, our wastewater management services include sample testing, monitoring and treatment.

# DISASTER AND EMERGENCY MANAGEMENT

We are a valued partner in emergency response around the globe. From the 2005 earthquake in Pakistan to British Columbia's 2017 wildfires, we have supported municipalities, provincial and federal governments, and NATO's global operations.

## Resilience Consulting

We have expertise in hazard identification and risk assessments (HIRA), response planning, ICS training & exercises, policy reviews, business continuity plans, and more.

## Mission Critical Services

When disaster strikes, our ICS trained teams can be on the ground providing essential support services to first responders, such as drinking water, food, shelter, sanitation (toilets, showers, laundry), as well as contributing to the logistics assessment and procurement process. In addition, we can restore essential services by providing emergency power, lighting, and sanitation.

## Incident Facilities & Structures

Trust our considerable experience in establishing and managing essential facilities such as camps, bases and incident command posts across some of the most inhospitable regions in the world. Our fleet of structures includes bedrooms, washrooms, kitchens and mobile offices.

## Recovery Consultancy

Let us help you through the recovery stage to plan and rebuild. Whether it's making sure your business operates without interruption or building a community, we're with you every step of the way.

## WHERE WE WORK

Over the past seven decades ATCO has served clients in over 100 countries from our more than 50 global offices. Our range lets us tap into local expertise that adds essential insight into everything we do, from Canada's North to the complexities of military operations.

### The Arctic

Working in the world's most northern regions has provided a variety of important experiences, but collaboration remains our most essential tool. Wherever we work, we build partnerships that last, bringing real economic and social benefits to the communities we work in.

### Europe

Through our European operations, we have worked extensively with NATO Armed Forces in Afghanistan and

the Balkans, as well as non-government organizations. It's a perfect example of how our international expertise gives us global reach.

### Africa

As we embark on a new frontier, our global growth brings us to Africa, where we work with world aid organizations to support their operations.

## PROFILE: Kandahar Airfield

In July 2007, we were awarded five contracts to provide multiple support services at Kandahar Airfield in Afghanistan for more than 20,000 troops serving NATO's International Security Assistance Force. We hired and managed more than 600 personnel to deliver airfield services, waste and water services under the most challenging environment.

## PROFILE: NATO OPERATIONS

Since 2003, we have provided support for NATO/ EUFOR information systems in the Balkans. Based in Camp Butmir, Sarajevo, we handle all areas of CIS and Telecommunications for 3,000 multi-national users, including administration, maintenance, Service Desk, networking, CRYPTO, and Cable Plant.

We also provide facilities management services to support NATO's Strategic Airlift Capability at Papa Airbase in Hungary, and fire protection services at Camp Maréchal de Lattre de Tassigny, Kosovo.

## PROFILE: 2017 Hurricane Maria, Puerto Rico

When Hurricane Maria hit we were contracted by Amgen to provide emergency accommodations, laundry, showers and washroom facilities for contractors. To support Amgen employees without power for refrigeration, we produced 30,000 lbs of ice per day to help keep food safe.

# ONE COMPANY, INFINITE POSSIBILITIES

---

ATCO is a diversified global corporation delivering service excellence and innovative business solutions in Structures & Logistics, Electricity, Pipelines & Liquids, and Retail Energy.
