Forward-Looking Information

Statements made by representatives for ATCO Ltd. and Canadian Utilities Limited and information provided in this presentation may be considered forward-looking statements. By their nature, such statements are subject to numerous known and unknown risks and uncertainties and therefore actual results may differ materially from those currently anticipated. ATCO Ltd. and Canadian Utilities Limited disclaim any intention or obligation to update or revise such statements. Due to the nature of the Corporation's operations, quarterly revenues and earnings are not necessarily indicative of annual results.

Other Financial Measure Disclosure

This presentation makes reference to Adjusted Earnings, which is a key measure of segment earnings that is used to assess segment performance and allocate resources. Adjusted earnings is defined as earnings attributable to Class I and Class II Shares, after adjusting for the timing of revenues and expenses associated with rate-regulated activities and unrealized gains or losses on mark-to-market forward and swap commodity contracts. Adjusted earnings also excludes one-time gains and losses, impairments, and items that are not in the normal course of business or a result of day-to-day operations.

Adjusted earnings presents earnings from rate-regulated activities on the same basis as was used prior to adopting IFRS - that basis being the US accounting principles for rate-regulated activities. Management's view is that adjusted earnings allow for a more effective analysis of operating performance and trends. A reconciliation of adjusted earnings to earnings attributable to Class I and Class II Shares is presented in the quarterly MD&A and in Note 3 of the unaudited interim consolidated financial statements.

Energy Transition: Leading The Way

We recognize clean energy as being the future and we're proud to lead the energy transition.

OUR ENERGY TRANSITION STRATEGY IS BROKEN DOWN INTO THREE KEY COMPONENTS:

Renewable Generation

- Investing in solar installations throughout Alberta
- Reducing reliance on diesel in remote communities through solar generation
- Delivery of hydro electricity in Alberta and Mexico
- Connecting wind energy to the grid

Clean Fuels

- Our hydrogen focused Clean Energy Innovation Hub and Clean Energy Innovation Park projects in Australia
- Hydrogen blending projects in Alberta and Australia
- Renewable Natural Gas (RNG) generation utilizing agriculture and municipal waste

Energy Storage

- Expanding and optimizing existing storage assets to ensure reliability of our energy system
- Investing in storage infrastructure as a key enabling factor for decarbonization
- Supporting large industrial and energy customers in achieving their decarbonization goals
