

The ATCO logo is displayed in white, bold, sans-serif capital letters. A thick orange horizontal line is positioned directly beneath the letters.

# INSTALL NATURAL GAS IN HIGH RISE WITHOUT THE HIGH COSTS.

Residents want the option of natural gas but the costs associated with installing the required infrastructure can be a barrier for developers. ATCO can help.

## ATCO CAN SUPPLY, INSTALL AND ASSIST WITH THE COSTS OF GAS INFRASTRUCTURE.

### THIS INCLUDES:

- A gas service pipe to the building
- Individual metering for each apartment on every level
- A central gas service riser within the building to supply individual apartment master meters
- A master meter-set for central hot water plant
- A master gas regulator for the building if required

This means that the installation of gas cooktops in each apartment, along with a centralised gas hot water system is cost effective in a high-rise development.

And we know that residents want to cook and save with natural gas, because of the many benefits it offers:

### LIFE'S BETTER WITH NATURAL GAS

 **70% LESS**  
GREENHOUSE GAS<sup>2</sup> |  **HOT WATER**  
NEVER RUNS OUT

<sup>2</sup>Source: Energy Networks Australia – Reliable and clean natural gas for Australian homes, page 6, Table – Emission Factors of Electricity and Gas (October 2017)

\*If you opt to install gas hot water but not gas cooking, ATCO can still provide, install and assist with the costs of a master gas meter-set at ground level.

## THE BENEFITS SPEAK FOR THEMSELVES.

Along with the significant cost saving that comes with having the infrastructure supplied and installed by ATCO, there are numerous benefits for your prospective customers:

- ✓ INDIVIDUAL METER READINGS MEAN FEWER DISPUTES OVER GAS USE
- ✓ RESIDENTS ARE FREE TO CHOOSE THEIR OWN GAS RETAILER
- ✓ PEACE OF MIND KNOWING THEIR ENERGY CHOICE IS BETTER FOR THE ENVIRONMENT
- ✓ RESIDENTS WANT TO COOK WITH GAS
