ATCO

The image features a modern, multi-story educational building with a prominent red, geometric lattice facade on the upper levels. The building has large windows and a dark metal frame. A set of stairs is visible on the right side. The sky is clear blue. On the left side, there is a decorative graphic consisting of overlapping triangles in shades of yellow, orange, and grey. The ATCO logo is positioned at the top center, with the word 'EDUCATION' below it. A dark blue diagonal banner at the bottom left contains a list of facility types in yellow text.

ATCO has been the market leader for over 70 years in the design, manufacture, supply and installation of innovative modular buildings. We operate throughout Australia with manufacturing facilities in Queensland, Victoria and Western Australia.

Our experience has involved collaborating with small to large Private Schools, DET, Universities, TAFE Colleges and Childcare Centres, to deliver the highest quality projects with unique modular solutions.

With the flexibility of **purchase, rental or lease to buy**, our specialised team can provide you a wider choice for your school's individual needs.

ATCO understand the need for temporary solutions for the Education sector due to the demand for additional space as education facilities experience peaks and troughs throughout the year. If extra space or facilities are required, we have a specialised Hire fleet of buildings designed for Classrooms, Administration buildings, Libraries, Outside School Hours Care, Toilets and Amenities which are available for short or long-term arrangements.

"I have been associated and dealing with ATCO representatives from the start of 2003 and we have achieved many projects such as installations of classrooms, sourcing office solutions and relocating buildings. These works have been carried out to an excellent standard and efficiently, always finishing the tasks on time. I have no hesitation in recommending ATCO Structures staff and the work they do."

PERMANENT SOLUTIONS

ATCO's wide range of building capabilities extends to producing customised permanent building solutions that have the look, feel and performance of traditional in-situ construction with the added benefits of modular.

- ▲ Minimal Site Disruption
- ▲ Short Construction Time
- ▲ Relocatable

Our experienced Design and Project Management teams enables us to support our customers through each phase of development, from initial feasibility through to detailed design, documentation, construction management, commissioning and handover to offer a **full turn key solution**.
