VEGETATION MANAGEMENT

ATCO

VEGETATION MANAGEMENT SERVICES

From implementing your planned programs to providing insight and innovations based on our own experiences, ATCO provides a wide range of customizable vegetation management solutions to reduce your operational risks. We leverage our in-house team of inter-provincially certified forest professionals and industry-leading software to exceed your expectations.

OUR SOLUTIONS

ATCO's well-honed vegetation management practices and processes are cost-effective, safe and adaptive to any environment or jurisdiction. Typical applications include:

Program Planning

- Vegetation inventory collection (LiDAR and ground-based)
- Consenting, access and permitting
- Clearion spatial planning tools and work packaging
- Treatment strategy development and budgeting
- Budget development and management
- Tender contract development
- Regulatory compliance and documentation

Operations & Maintenance

- Mechanical and chemical hazard reduction work plans
- Wildfire prevention and hazard reduction initiatives
- Vegetation control and noxious weed management
- Contractor management
- Customer and stakeholder relations

Construction-Based Services

- Construction clearing and access development
- Contractor management
- Site or right-of-way reclamation

HOW OUR SOLUTIONS WORK FOR YOU

- Long-term, cost-efficient maintenance of your key assets
- Strengthen system reliability and operational integrity
- Satisfy regulatory requirements, including wildfire prevention and bolstering public and worker safety
- Strong understanding of utility and pipeline needs (budget and scheduling adjustments, program deferrals)
- Strong relationships with Indigenous communities and partners across western and northern Canada

WHY ATCO

With 65,000 km of pipeline, 88,000 km of electric transmission and distribution power line and 291 substation sites across Alberta, we understand how critical timely and cost-effective right-of-way maintenance can be. We leverage emerging remote inventory technologies and innovative approaches to herbicide to reduce maintenance costs while meeting stakeholder and regulator expectations.

A strong vegetation management program pays dividends in the long term. When you partner with us, you leverage our extensive expertise and full understanding of vegetation management. Through our utility-focused workforce across western Canada and our deep understanding of right-of-way vegetation and access management, we are well positioned to offer a comprehensive solution.
