# COMMERCIAL METER SET ENCLOSURES

Custom designed structures  
for commercial meter sets

**ATCO** | ALWAYS THERE.  
ANYWHERE.

# What Are Commercial Meter Set Enclosures?

Commercial Meter Set Enclosures are stand-alone structures constructed on private property that store commercial meter sets providing a visually appealing look while maintaining access to the gas meters.

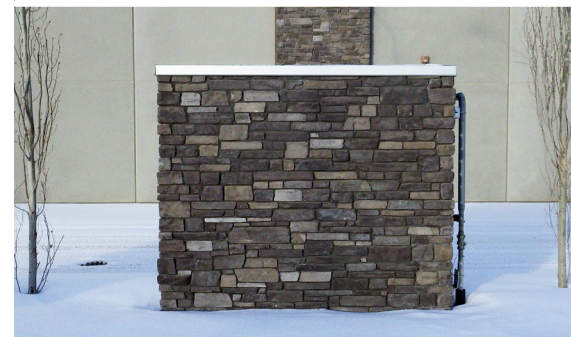

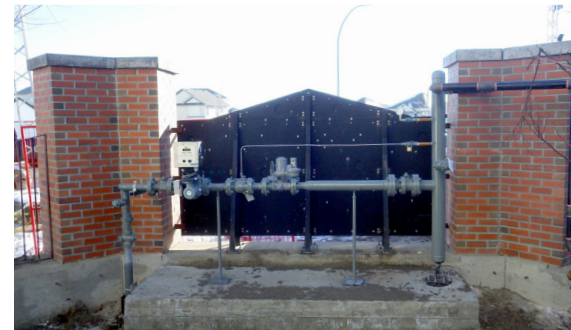

## Meter Set Enclosure Options

- Constructed to **blend in with the surrounding architecture of the site.**
- Designed in a variety of finishes** such as wood, stone, brick, concrete or masonry blocks.
- Flexibility to conceal meters within existing enclosures** such as entrance signs or within new discrete safe locations including behind walls, fences or recycling areas.

## Enclosure Benefits

- Reduce natural gas installation time.**
  - o Get your permanent meter set installed before construction.
- Eliminates the need for propane or diesel fuel during construction.**
  - o Natural gas is readily available for construction heat and power.
- Reduce service installation costs.**
  - o Shorter primary service lines.
- Improve your control over your work site construction schedule with contractors.**
  - o Install the secondary system when you need to.

## Enclosure Examples

ATCO will **work with you to design an enclosure that works** for your development
