THIRD-PARTY SECONDARY GAS LINES

OPERATIONS & MAINTENANCE

ATCO's Operations & Maintenance team provides best-in-class service, offering resources and geographical coverage that is unmatched for natural gas transmission and distribution systems. We offer a workforce of trained, experienced and certified personnel for virtually every job, and deliver on-time service anywhere in Alberta. When you need to depend on someone to provide reliable service, ATCO is the clear choice.

WHAT IS A SECONDARY GAS LINE?

A secondary natural gas pipeline is a privately owned and maintained underground pipe (and associated fittings) used to deliver metered natural gas from an existing customer meter to another area such as a garage, outdoor gas appliance or other building(s).

OUR SOLUTIONS

ATCO has more than 100 years of experience delivering natural gas safely and reliably. As a result, our people have a deep understanding of the systems and infrastructure needed for the transmission and distribution of natural gas. We are now providing that expertise to customers in the form of third-party secondary gas lines. Our team can help to safely and dependably install or change a secondary gas line to meet your needs. What do we offer?

Installation

If you need a secondary pipeline (new or additional) installed at your residence or business, we can help. Our team will review, analyze and safely connect the new secondary pipe to an existing gas line, which would then run from your meter or building to another.

Modifications & Alterations

If you're wanting to access more natural gas from your current secondary system, we can help by altering an existing natural gas line to meet your needs. For example, our team can divert or extend a line, or can disconnect an existing secondary line to adapt to your needs.

Peace of Mind

We employ a proactive approach to secondary gas lines to help determine the possibility of any under or above ground leaks on your natural gas system. We can also repair a secondary gas line system disrupted by a leak or hit line situation.

Maintenance & Support

Our dedicated team is experienced and trained to support and maintain your secondary gas system and its integrity by providing services such as leak surveys, valve inspections and more.

WHY ATCO

ATCO delivers high-quality business solutions to our customers across the globe. ATCO is the right choice for you if you need:

- Premier service for your natural gas system
- Expert technicians and dependable service
- An unmatched commitment to safety
- A company you can count on
