## EXPEDITIONARY CAMP INFRASTRUCTURE

### RAPID DEPLOYMENT TURN-KEY CAMPS

For over seven decades ATCO has been providing life support services around the world. Your needs are as varied as the locations in which you work. If you are often faced with quick or unexpected mobilization requirements and need crucial, integrated, expeditionary infrastructure packages, we can help.

Operating in harsh, remote environments, the military, humanitarian relief, extractive operations, construction and engineering and other industries are often faced with a lack of basic life support infrastructure. Frontec's APOLLO Rapid Deployment Expeditionary Camp Infrastructure incorporates and integrates six elements under one roof.

**Modular  
Accommodation**

**Ablutions**

**Kitchen**

**Water  
Treatment**

**Wastewater  
Treatment**

**Power  
Technologies**

These six elements are optimized, pre-packaged and stocked in central hubs around the world. We offer unprecedented flexibility in procuring your package on a rental basis, so you don't have to invest heavily in assets.

# OPTIONS TAILORED TO YOUR NEEDS

With military-grade inflatable tents in a range of sizes and plug-n-play features including water supply, treatment and power generation, we can rapidly deploy a custom solution in as little as two weeks.

## ACCOMMODATION

Variety of standalone tents or easily expandable inflatable tents joined by centerpieces.

-  42 m<sup>2</sup> Tent  1-6
-  56 m<sup>2</sup> Tent  1-8
