Since 1981, ATCO has been creating successful Indigenous partnerships throughout Northern Canada and Alaska. Whenever we begin a project, we engage communities to learn about their unique needs and provide opportunities that meet those needs.

Partnerships are the most effective way of sharing benefits between ATCO and a community. By operating together, we share revenue, expertise, and employees. From helping local businesses develop to providing them with contracting opportunities to participate in our projects, our economic partnerships currently extend to 29 Indigenous communities across Canada and Alaska.

Partnerships allow us to do more than just share in a project's revenue. They also allow us to extend benefits including:

- Employment
- Education and skills training
- On-the-job training
- Procurement and subcontracting
- Support for new Indigenous businesses

We have invested over $170 million in Indigenous communities and programs, awarded over $260 million in subcontracts and grossed over $1 billion in revenue for our Indigenous partners across Canada.
Real Property North
Providing facility inspection, maintenance and repair, new construction and upgrades, trade services and environmental services to Canadian Armed Forces sites in Yellowknife, Whitehorse, Iqaluit and Rankin Inlet.

NorthwestTel
For the past 20 years, the business has provided facility maintenance and airport services at 110 microwave sites across Northern British Columbia, the Northwest Territories, Nunavut and the Yukon through a partnership between Frontec and the Northern Aboriginal Services Company (nASCo). The contract includes operation and maintenance of all power generating systems.

Iqaluit Airport
Frontec provided operations and maintenance services for the Iqaluit airport from 1999 to 2004. This included services such as 24-hour security, roads and grounds maintenance, facility maintenance, mechanical services, wildlife control, janitorial, boiler and generator maintenance.

North Warning System
From 1987-2014, Nasittuq (a partnership between Frontec and the Pan Arctic Inuit Logistics Corporation) operated and maintained the North Warning System - a network of radars protecting North America’s security and sovereignty. Nasittuq still provides site support and management services for the Ellesmere Island commercial support contract in Alert, Nunavut.

Alaska Radar System
ARCTEC Alaska, a partnership between Frontec and ASRC Federal Primus, provides operations and maintenance services to 15 strategic radar sites that form the Alaska Radar System (ARS) under the authority of the United States Department of the Air Force.

Since 1981, ATCO has been creating successful Indigenous partnerships throughout Northern Canada and Alaska. Whenever we begin a project, we engage communities to learn about their unique needs and provide opportunities that meet those needs.

Partnerships are the most effective way of sharing benefits between ATCO and a community. By operating together, we share revenue, expertise, and employees. From helping local businesses develop to providing them with contracting opportunities to participate in our projects, our economic partnerships currently extend to 29 Indigenous communities across Canada and Alaska.

Partnerships allow us to do more than just share in a project’s revenue. They also allow us to extend benefits including:

- Employment
- Education and skills training
- On-the-job training
- Procurement and subcontracting
- Support for new Indigenous businesses

We have invested over $170 million in Indigenous communities and programs, awarded over $280 million in subcontracts and grossed over $1 billion in revenue for our Indigenous partners across Canada.
