

CANADIAN UTILITIES LIMITED ESG DATASHEET

The purpose of this *ESG Datasheet* is to provide an overview of Canadian Utilities Limited's (Canadian Utilities) operational performance. Some of the performance data is discussed in more detail within the 2022 Sustainability Report. The Datasheet should be read in conjunction with the Sustainability Report and is not to be viewed as a substitute. The full report is available at [ATCO.com](https://www.atco.com).

- [Task Force on Climate-related Financial Disclosures \(TCFD\)](#)

Reporting boundaries

The terms Canadian Utilities and CUL refer to Canadian Utilities Limited, as a whole, including its subsidiary company CU Inc. Our Sustainability Report is referencing the internationally recognized Global Reporting Initiative (GRI) Standards and guided by the Sustainability Accounting Standards Board (SASB) and the Financial Stability Board's Task Force on Climate-related Financial Disclosures (TCFD) recommendations.

This datasheet communicates our sustainability performance in 2022 and reflects operations as of December 31, 2022 unless otherwise noted, for Canadian Utilities Limited. Financial data is in Canadian dollars and environmental data is in metric units. Environmental performance metrics reported include 100 per cent for facilities where ATCO, or one of its subsidiaries, has operational control, regardless of percentage of financial ownership. Operational control is defined in alignment with the GHG Protocol. Exceptions are explicitly noted in the data notes with the relevant information. We also have investments in LUMA Energy (50 per cent), which is not included in our operational control boundary, as defined in alignment with the GHG Protocol. However, we expect our business partners and joint venture operations to adhere to the same or similar ethical standards and we take an active role on partnership and joint venture boards, where possible.

- (1) Canadian Utilities' 100 per cent owned subsidiary CU Inc. includes Electricity Distribution, Electricity Transmission, Natural Gas Distribution and Natural Gas Transmission.
- (2) International Natural Gas Distribution is a regulated provider of natural gas distribution services in Western Australia, serving metropolitan Perth and surrounding regions.
- (3) Canadian Utilities owns and operates 348 MW of non-regulated electricity generation assets in Australia, Mexico, Canada and Chile and 103 MW of assets under development in Canada as of December 31, 2022. Subsequent to year-end, 242 MW of operational non-regulated electricity generation was added when the acquisition of Suncor Energy Inc.'s renewable energy portfolio closed on January 3, 2023.
- (4) Storage & Industrial Water builds, owns and operates non-regulated natural gas storage, natural gas liquids storage, natural gas related infrastructure, and industrial water.
- (5) Clean Fuels includes large-scale hydrogen production opportunities, renewable natural gas, and technical expertise support.
- (6) ATCO Energy Ltd. (ATCOenergy) includes Rūmi, Blue Flame Kitchen, and Retail Energy and offers home products, home maintenance services, professional homeowners advice, and retail electricity and natural gas services in Alberta.

Canadian Utilities Limited Performance Summary

Indicator ¹	Units	2022	2021	2020
Environment				
Greenhouse Gas Emissions^{2,3,4}				
Operational direct (Scope 1) greenhouse gases	kilotonnes CO ₂ e	776	734	859
Operational indirect (Scope 2) greenhouse gases	kilotonnes CO ₂ e	246	245	243

We strive to continually improve our tracking and measurement systems and may adjust indicator definitions and performance data to reflect current best practice. In most cases, we use standard industry and regulatory calculation methodologies and definitions that may be updated periodically to improve accuracy.

Indicator

1. This summary table consolidates data for Canadian Utilities Limited (CU, CU.X).

Environment

2. Unless otherwise noted, data is reported on an operatorship basis, which does not align with financial reporting. Operatorship basis means that environmental performance metrics reported include 100 per cent from operations over which CUL, or one of its subsidiaries, has operational control, regardless of percentage of financial ownership.
3. GHG emissions are calculated and reported in line with carbon regulations where the facility is located and the Greenhouse Gas Protocol: A Corporate Accounting and Reporting Standard (GHG Protocol).
4. Equity-basis reporting aligns with financial reporting in relation to treatment in external financial filings and is also guided by the GHG Protocol. However, our equity share emissions of LUMA has not yet been included in reported 2023.
5. GHG emissions intensity is calculated by dividing equity basis reporting basis direct (Scope 1) and indirect (Scope 2) GHG emissions over earnings. Earnings are adjusted earnings as defined in the CUL Management's Discussion and Analysis (MD&A).
6. Scope 3 GHG emissions are calculated and reported in line with the GHG Protocol: Corporate Value Chain (Scope 3) Accounting and Reporting Standard. We currently report Scope 3 GHG emissions from the two categories most material to our business. Note that, storage, handling and transmission of natural gas is not included in our Scope 3 calculations however, any associated emissions from facilities to handle and move these products are captured in direct (Scope 1) GHG emissions. As the guidance on the reporting of Scope 3 GHG emissions continues to evolve, we will annually review this approach to ensure we are in line with best practice.
7. Water use is calculated by deducting water discharged from water withdrawn. The decrease in water consumption for 2022 is mainly attributable to the decrease in activity in our Energy Infrastructure and Storage business.
8. Includes spills that meet thresholds for regulatory reporting in the jurisdiction in which they occurred. Volume spilled is often estimated due to variables such as duration, location and when the spill was identified.

9. In 2022, 78% of hydrocarbon spills were related to vandalism incidents to electrical transformers.
10. This metric has been established to be intentionally broad to demonstrate various ways we are contributing to the energy transition, and does not align with typical operational control or financial basis concepts. Renewable energy is included in three circumstances: 1) Ownership of a renewable project when CUL has financial control; 2) Development of a renewable project where CUL has an engineering, procurement and construction contract, but ultimately no financial or operational control once in operation; and 3) Management or operation of a renewable energy asset for a customer, however, CUL doesn't have ownership.
11. Transitional products and services are defined as products or services that reduce Scope 1, 2 or 3 GHG emissions. They can include products or services that are lower carbon or to upgrade existing activities and systems.

Social

12. Includes our temporary workforce but does not include joint venture (JV) employees, unless otherwise noted.
13. Our contractor safety rates do not cover all contractors since some of our business units only track safety statistics for certain work mode classification (focus on where we have a supervisory, inspection or monitoring role), or contractors with greater than a threshold contract size.
14. Data is not included for all employees of CUL JVs, however, is included where available and when CUL has the governing authority and responsibility for the health and safety of the people, processes and facility.
15. Senior Management includes senior executive officers (which aligns with disclosures in the Management Proxy Circular).
16. Minorities includes people of different race and ethnic backgrounds. Note that this metric only includes those who choose to self-identify, may not align with local definition in all operating jurisdictions, and does not include persons with disabilities or LGBTQ2S+.
17. The increase in the Indigenous share of revenue generated from Indigenous JVs is mainly attributed to the share purchase agreement between Denendeh Investments Incorporated and ATCO Electric Ltd to increase DII's ownership stake in Northland Utilities Enterprises from 14 per cent to 50 per cent.
18. Net Economic Benefit to Indigenous groups equals net earnings from Indigenous JVs, partnership payments, Indigenous procurement and additional economic benefits.

Governance

19. We track and address concerns through several channels, including our internationally accessible ATCO Integrity Line. Only incidents that have been substantiated by an external authority have been included.
20. Non-environmental regulatory non-compliance incidents include one incident regarding the Jasper AUC incident, and three incidents related to the power generation requirements in Alberta.

Economic

21. Economic value generated is equal to revenue as defined in the MD&A.
22. Employee wages and benefits include employee salaries and amounts paid to government institutions on behalf of employees plus total benefits.
23. Payments to governments include income, property, and franchise taxes.
24. Distributions to communities include donations, in-kind contributions, and sponsorships.
25. Economic value retained is economic value generated minus economic value distributed. This is not a financial reporting indicator and should not be confused with retained earnings.

Operational

26. SAIDI, or System Average Interruption Duration Index, disclosed in minutes, is defined as the total duration of an interruption for the average customer during the period under reporting.
27. SAIFI, or System Average Interruption Frequency Index, is defined as the average number of times that a system customer experiences an outage during the period under reporting (per year).

Canadian Utilities Limited Sustainability Framework References

This section includes references to a variety of publicly available documents that contain governance, economic, environmental, and social information for 2022, including the Annual Report, Sustainability Report, financial filings, and website.

This reference document contains information for Canadian Utilities Limited (CU, CU.X), which should not be misconstrued as ATCO Ltd. (ACO.X, ACO.Y).

Task Force on Climate-Related Financial Disclosures

Canadian Utilities Limited has always been a proponent of reporting core non-financial information and indicators to provide meaningful, efficient and transparent disclosures in priority areas for customers of our sustainability reporting (i.e. investors, business partners, customers, communities, Indigenous groups, employees, and governments).

In 2022, Canadian Utilities expanded alignment to the Financial Stability Board's Task Force on Climate-related Financial Disclosures (TCFD) recommendations. We have provided available mapping to existing disclosures below, and plan to continue to evolve our external disclosure around climate-related risks and opportunities in alignment with the TCFD recommendations.

For more information on the TCFD, please visit www.fsb-tcfd.org.

TCFD Recommendations		Links to Canadian Utilities Limited Information
Governance		
Disclose the organization's governance around climate-related risks and opportunities.	Describe the board's oversight of climate-related risks and opportunities.	The board and committees of the board provide oversight on material sustainability topics, including climate-related risks and opportunities. Our Sustainability Report (pp. 40-42) describes the board's oversight of climate-related risks and opportunities, as well as the roles and responsibilities of the board committees. The Management Proxy Circular (pp. 29-39) provides more information on our overall approach to governance. The board fully endorses our strategic 2030 ESG Targets and commitment to net-zero emissions by 2050.
	Describe management's role in assessing and managing climate-related risks and opportunities.	Management assesses material climate-related risks and opportunities to determine the best course of action. Our Sustainability Report (pp. 40-42) describes management's role in assessing and managing climate-related risks and opportunities. The Management Proxy Circular (pp. 29-39) provides more information on our overall approach to governance.

TCFD Recommendations		Links to Canadian Utilities Limited Information
Strategy		
Disclose the actual and potential impacts of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning where such information is material.	Describe the climate-related risks and opportunities the organization has identified over the short, medium, and long term.	Our climate-related risks and opportunities include policy/regulatory, market, technology, reputational, and physical risks. The Management's Discussion & Analysis (pp. 5-8), Management's Discussion & Analysis (pp. 36-40), Management's Discussion & Analysis (pp. 52-61) and Sustainability Report (pp. 17-22) describe the material climate-related risks and opportunities we have identified.
	Describe the impact of climate-related risks and opportunities on the organization's businesses, strategy, and financial planning.	Sustainability is interwoven into our businesses, strategy, and planning. Our Sustainability Report (p. 6) provides an overview of how climate-related risks and opportunities are integrated throughout the organization. The Management's Discussion & Analysis (pp. 3-4), Management's Discussion & Analysis (pp. 5-8), Management's Discussion & Analysis (pp. 36-40), Management's Discussion & Analysis (pp. 52-61), and Sustainability Report (pp. 17-22) provide more information on how we incorporate climate-related risks and opportunities into our businesses, strategy, and planning.
	Describe the resilience of the organization's strategy, taking into consideration different climate-related scenarios, including a 2°C or lower scenario.	In 2021 we conducted a significant decarbonization modelling project for our energy businesses, which highlighted the resilience of our business model and strategy to decarbonize. The Management's Discussion & Analysis (pp. 36-40) and Sustainability Report (pp. 17-22) provide more information on our climate-related strategies and resiliency.
Risk Management		
Disclose how the organization identifies, assesses, and manages climate-related risks.	Describe the organization's processes for identifying and assessing climate-related risks.	Our enterprise risk management process allows us to identify and assess risks by both severity of impact and probability of occurrence, including climate-related risks. The Management's Discussion & Analysis (pp. 36-40), Management's Discussion & Analysis (pp. 52-61), Sustainability Report (pp. 17-22) and Sustainability Report (pp. 40-42) provide more information on how we identify and assess climate-related risks.
	Describe the organization's processes for managing climate-related risks.	Our enterprise risk management process allows us to identify and assess risks by both severity of impact and probability of occurrence, including climate-related risks. The Management's Discussion & Analysis (pp. 36-40), Management's Discussion & Analysis (pp. 52-61), Sustainability Report (pp. 17-22) and Sustainability Report (pp. 40-42) provide more information on how we manage climate-related risks.
	Describe how processes for identifying, assessing, and managing climate-related risks are integrated into the organization's overall risk management.	Our enterprise risk management process allows us to identify and assess risks by both severity of impact and probability of occurrence, including climate-related risks. The Management's Discussion & Analysis (pp. 36-40), Management's Discussion & Analysis (pp. 52-61), Sustainability Report (pp. 17-22) and Sustainability Report (pp. 40-42) provide more information on how identifying, assessing, and managing climate-related risks are integrated into our overall risk management processes.

Metrics and Targets		
Disclose the metrics and targets used to assess and manage relevant climate-related risks and opportunities where such information is material.	Disclose the metrics used by the organization to assess climate-related risks and opportunities in line with its strategy and risk management process.	The Canadian Utilities Limited Performance Summary (pp. 3-8) outlines the metrics we use and our performance.
	Disclose Scope 1, Scope 2, and, if appropriate, Scope 3 greenhouse gas (GHG) emissions, and the related risks.	The Canadian Utilities Limited Performance Summary (pp. 3-8) outlines our Scope 1, Scope 2, and Scope 3 GHG emissions. Our Sustainability Report (pp. 17-22) provides more information on our Scope 1, Scope 2, and Scope 3 GHG emissions.
	Describe the targets used by the organization to manage climate-related risks and opportunities and performance against targets.	In January 2022, we published a News Release announcing an initial set of strategic 2030 ESG Targets as well as a commitment to net-zero emissions by 2050. The Management's Discussion & Analysis (pp. 3-4) provides more information on how we plan to achieve these targets, and the 'Scorecard' section of the Management's Discussion & Analysis (pp. 12-19) outlines our strategic priorities and progress towards targets. Our Sustainability Report (pp. 8-10, 12-14, 18-19, 29-30, 33, 38, 41-42) provides more detailed information on our ESG Targets and net zero commitment, and the Canadian Utilities Limited Performance Summary (pp. 3-8) outlines our performance towards targets.
